ALBERTO SANGUINETTI ZAVALA
Mérida, Yucatán, México | (+52) 999 228 1691
albertosanguinetti0@gmail.com | github.com/Saza4

Associate Degree holder and Engineering student in Virtual Environments and Digital Business, with hands-on experience architecting scalable web platforms (Laravel, React, NestJS, TypeScript) and building interactive environments (Unity, Blender). Passionate about business process digitalization, data management and visualization (MySQL, PostgreSQL, Apache Superset), and DevOps best practices (Docker, Git/GitHub). Looking to apply these skills to projects that require scalable, high-performance full-stack solutions.

EDUCATION

Universidad Tecnológica Metropolitana (UTM) *Mérida, Yucatán, Mexico*
B.Eng. in Virtual Environments and Digital Business 2024 – 2026 (graduated)

Universidad Tecnológica Metropolitana (UTM) *Mérida, Yucatán, Mexico*
Associate Degree (TSU) in Virtual Environments and Digital Business 2022 – 2024 (graduated)

EXPERIENCE & PROJECTS

"MI" – Vocational Guidance & EdTech SaaS Platform *Mérida, Mexico*
Full-Stack Developer & Co-Founder 2025

- Architected a full-stack solution with Laravel 12 (PHP 8.2) and React 19, implementing secure authentication via Laravel Sanctum and granular role-based access control with Spatie (RBAC).
- Designed and built an automated web-scraping system to centralize and refresh Mexican universities' academic offerings in real time.
- Developed admin dashboards visualizing financial metrics and user growth, integrating Stripe payments to power a subscription model.
- Modeled complex relational database schemas in MySQL for nationwide catalogs of universities, degree programs, and curricula.
- Orchestrated the software development lifecycle (SDLC) with Docker and Git/GitHub, standardizing version control and continuous integration.

GTFS (General Transit Feed Specification) File Generator *Mérida, Mexico*
Full-Stack Developer — Academic project / Yucatán Transportation Agency (ATY) 2026

- Built a REST API with NestJS 11 and TypeScript on PostgreSQL to manage the GTFS standard (agencies, routes, stops, trips, schedules, and geometries).
- Built the frontend with Next.js 16 (App Router) + React 19 + Tailwind CSS v4, including a visual route editor with Leaflet maps and snap-to-road via OSRM.
- Implemented CSV/ZIP GTFS import-export (batches up to 300 MB, row-level transactional validation) and a schedule-interpolation pipeline with a timetable editor built for real operational use.

Technical Support & Hardware Optimization Services *Independent*
Independent Technician

- Diagnosed and resolved laptop hardware failures, extending the useful life of technology assets.
- Increased device performance by up to 40% through strategic hardware upgrades (SSD, RAM) and software environment configuration.

LEADERSHIP & ACTIVITIES

Interactive Environments & Game Development *Personal projects*

Designer & Programmer

- Designed and programmed gameplay mechanics for 2D/3D video games using Unity (C#), with a focus on user experience (UX).
- Modeled optimized 3D assets in Blender for integration into low-resource virtual environments.

SKILLS & INTERESTS

Web & Backend Development: Laravel (PHP 8.2), React 19, Next.js 16, NestJS, TypeScript, REST APIs, HTML5, CSS3

Data & DevOps: MySQL, PostgreSQL, MongoDB, TypeORM, Apache Superset, Docker, Git/GitHub

Virtual Environments & 3D: Unity (C#), Blender (3D modeling), game mechanics design

Video Editing: Adobe Premiere, Adobe After Effects, Vegas Pro
